Snake Trivia Answers

1. Snakes shed their skin several times a year. **(True)**
 - They shed more when they are younger and growing and less as they get older.
2. Snakes are more afraid of us than we are of them. **(True)**
3. Snakes are slimy. **(False)**
 - Only when wet!
4. Snakes do more good than harm. **(True)**
 - Snakes help keep pest populations under control.
5. Snakes spend the winter underground. **(True)**
 - They hibernate underground in what is called a hibernaculum.
6. Snakes chase people. **(False)**
7. Snakes have eyelids. **(False)**
 - Don't ever get into a staring contest with a snake!
8. All snakes lay eggs. **(False)**
 - Some lay eggs, some give live birth and some the eggs hatch inside the snake and then come out!
9. Some snakes can climb trees. **(True)**
10. Snakes smell with their tongues. **(True)**
 - Snakes collect odor particles in the air on their tongue and then "taste" them using their Jacobson's organ in the roof of their mouth.
11. Some snakes eat other snakes. **(True)**
 - Kingsnakes eat other snakes, even venomous snakes!
12. All snakes can swim. **(True)**
13. Snakes only strike when coiled. **(False)**
 - They can strike in any position.
14. Snake repellants don't work. **(True)**
15. All venomous snakes have triangle shaped heads in NC. **(False)**
 - The very venomous coral snake's head is round!
16. Snakes have ears. **(False)**
 - Snakes have no visible ears but they "hear" vibrations through bones in their jaws.
