

You will need:

- A lure (something your prey likes)
- A blanket

Optional:

- Watch Zoo EDventures video about aquatics.

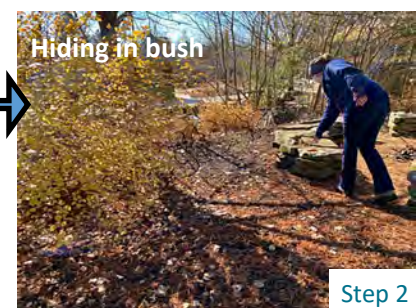

Directions:

1. Find your lure. Your lure or bait needs to be something that your prey really likes. This can be a dog treat or a candy bar depending on what you are trying to capture.
2. Lay your lure in a location where your prey will notice the item.

3. Take cover nearby and wait for your prey quietly.

3. When your prey approaches the lure, ATTACK! Attack with a fast, gentle capture. You can capture with a hug or a blanket.

Now... move on to your next target.
